

Superfund Redevelopment Pilots

Lake Calumet Cluster Chicago Department of Environment, IL

EPA's Superfund Redevelopment Initiative (SRI) is a nationally coordinated effort to facilitate the return of Superfund sites to productive use by selecting response actions consistent with anticipated use. The SRI Pilots are intended to help local governments enhance their involvement in the Superfund decision-making process by assisting EPA in predicting future land uses for Superfund sites. Under the Pilot Program, EPA will provide up to \$100,000 in financial assistance and/or services to local governments for specified activities. Applicants are offered several types of program assistance, including funding through a cooperative agreement, access to facilitation services, and/or the availability of personnel under the Intergovernmental Personnel Act (IPA).

an ecologically restored area with electrical generating facilities that use solar energy and natural gas. The other half of the sites will be reserved as open space and possibly wetlands. The city hopes to restore and enhance the property's natural habitat and provide a buffer between the neighboring environmental center and

landfills.

PILOT SNAPSHOT

Applicant Name: Chicago Department of Environment, IL

Site Name: Lake Calumet Cluster

Date of Selection: July 2000

Anticipated Award: Cooperative Agreement (\$100,000)

Profile: The city will develop a plan to reuse the sites, possibly as electrical generating facilities and as wetlands.
